

EPSON Direct CD Printing

Advantages

What is the advantage of printing directly onto a CD/DVD instead of printing a label and attaching it to the disc?

1. Lower Cost

Purchase only ink jet printable CD-Rs, instead of both CD-Rs and adhesive labels, and save up to 30%.

2. Convenience

It's an easy, one-step process. You won't have to waste time dealing with label placement.

3. Risk-Free; Eliminate Potential Drive Damage

Avoid any possible damage to your CD/DVD drive or player, which can sometimes occur with labels that peel off from heat, wear and time.

Only Epson offers printers with direct CD printing at affordable prices
