

Web Site 508 Regulation for [www.epson.com/northamerica.html](http://www.epson.com/northamerica.html)  
Section 1194.22 Web-based Internet information and applications

Criteria	Meet Criteria/Do Not meet Criteria	Remarks and Explanations
Provide a text equivalent for every non-text element (e.g. via “alt”, “longdesc”, or in element content. This includes: images, graphical representations of text (including symbols), image map, regions, animations (e.g. animated GIFs), applets and programmatic objects, ascii art, frames, scripts, images used as list bullets, spacers, graphical buttons, sounds (played with or without user interaction, stand-alone audio files, audio tracks of video and video.	Mostly meet criteria	Not every object online has an alt text.
Provide redundant text links for each active region of a server-side image map.	N/A	
Until user agents can automatically read aloud the text equivalent of a visual track, provide an auditory descriptions of the important information of the visual track of a multimedia presentation.	N/A	
For any time-based multimedia presentation (e.g. a movie or animation), synchronize equivalent alternatives (e.g. captions or auditory descriptions of the visual track) with the presentation.	N/A	
Ensure that all information conveyed with color is also available without color, for example from context or markup.	Meet criteria	
Clearly identify changes in the natural language of a document’s text and any text equivalent. (e.g. captions)	N/A	
For data tables, identify row and column headers.	N/A	
For data tables that have two or more logical levels of row or column headers, use markup to associate data cells and header cells.	N/A	
Organize documents so they may be read without style sheets. For example, when an HTML	Meet criteria	

document is rendered without associated style sheets, it must still be possible to read the document.		
Ensure that equivalents for dynamic content are updated when the dynamic content changes.	Do Not meet criteria	
Ensure that pages are usable when scripts, applets, or other programmatic objects are turned off or not supported. If this is not possible, provide equivalent information on an alternative accessible page.	Meet criteria	
Until user agents allow users to control flickering, avoid causing the screen to flicker.	N/A	
Make programmatic elements such as scripts and applets directly accessible or compatible with assistive technologies if functionality is important and not presented elsewhere	N/A	
Provide client-side image maps instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Meet criteria	
If, after best efforts, you cannot create an accessible page, provide a link to an alternative page that uses W3C technologies, is accessible, has equivalent information (or functionality), and is updated as often as the inaccessible (original) page.	Do not meet criteria	
Title each frame to facilitate frame identification and navigation	N/A	
Use the clearest and simplest language appropriate for a site's content.	Meet criteria
