

This is a disclosure statement from Epson America, Inc. for purposes of assisting federal employees to comply with Section 508 of the Rehabilitation Act of 1973. The information provided herewith is intended for informational purposes only and does not constitute a warranty of any kind.

Criteria Section (s)	Supporting Features Epson	Remarks & Explanations Epson
Software applications/OS (1194.21)	Stylus C40/C60/C80 Series	Stylus C40/C60/C80 Series
Pertains to usability for people with vision impairments e.g. alternative keyboard navigation.	Support w/minor exceptions	Support with minor exceptions on printers.
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Limited Support	Limited Support - Driver and software support keyboard access with minor exceptions. Screen reader does not consistently read Tab headings. On screen keyboard cannot access and run all features e.g. Utility Tab features.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any Os that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the OS and is available to the product developer.	Limited Support	Limited Support: Printer drivers do not interfere or disrupt any accessibility features. Tested with Windows Asscesibility Options. Magnifier cannot be used when installing Reference Guide; Screen Reader cannot read all slider bars in Driver UI.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Limited Support	Limited Support: Printer driver shows a well-defined on-screen focus with minor exceptions.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Support with minor exceptions	Support: Printer drivers shows help and pop-up text for controls however, pop-up text does not function when using keyboard to navigate (TAB).
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Support	Support: Meanings are consistent for all graphic controls.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Limited support	Limited support - some cases 'Alternate Text' is not provided. Some screens do not present all textual information.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Support w/ minor exceptions.	Support w/minor exceptions: Drivers do not set contrast and color choices for display. Some screens override display attributes, which may affect viewing in certain contrast modes.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Limited support	Printer Drivers use limited amount of animation for paper out, paper jam, etc. in STM. Information is also conveyed with text.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Support	Support: Drivers use simple text, graphics and color to convey information.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Support	Support: For brightness, contrast, saturation and hue settings in printer driver.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Support	Driver uses limited blinking or flashing icons for paper out, paper jam, etc. This information is also conveyed with text. Objects blink at less than 2 Hz.

Criteria Section (s)	Supporting Features Epson	Remarks & Explanations Epson
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Support with minor exceptions	Driver uses eReg & Ink Monitor to register and order online. Able to install driver, and register using Numeric Key Pad only. Did not require use of Tab Key, Space Bar or Mouse. Assistive Technology e.g. voice activation software to input name, address, etc. is supported. Also able to use a screen reader in most areas.
5 Self contained, closed products (1194.25) Pertains to information kiosks, calculators, copiers, fax machines, printers. Products shall be usable by people with disabilities without requiring an end-user to attach 'Assistive Technology' to the product. Personal headsets for private listening are not 'Assistive Technology'.		
(a) Not requiring end-user to attach Assistive Technology to the product.	Support	Support: Printer panel buttons on C40/C60/C80 are large, easy to access. Assistive Technology is not required to attach to this product. Users with visual disability may need to install AT in the host PC.
(b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	N/A	No timed responses are required.
(c) Where a product utilizes touchscreens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	N/A	NA - Buttons on the printer can be distinguished without activation. All buttons can be activated by one hand and require pressing to activate functions. Key repeat is not required. There are no locking or toggle keys or buttons for activating function
(d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	N/A	No biometric forms used for user identification.
(e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the sound.	N/A	No auditory output is provided.
(f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20	N/A	No voice output is provided.
(g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Support	Support: Drivers use text, graphics and color to convey information.
(h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided.	Support with minor exceptions	Support with Minor Exceptions: Drivers support brightness, contrast, saturation and hue settings. C40 Reference Guide some colors are not visible.
(i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Support	Out of paper/paper jam icons, etc. blink at a frequency within the requirements. Information is also conveyed with text.

Criteria Section (s)	Supporting Features Epson	Remarks & Explanations Epson
(j) (1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the maximum protrusion of the product within the 48 inch length on products which are freestanding, non-portable, and intended to be used in one location and which have operable controls.	N/A	Does not apply, these are not freestanding products.
(j)(2) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height shall be	N/A	Does not apply, these are not freestanding products.
(j)(3) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane	N/A	Does not apply, these are not freestanding products.
(j)(4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Operable controls shall not be more than 24 inches behind the reference plane.	N/A	Does not apply, these are not freestanding products.
7 Functional Performance Criteria (1194.31)		
Overall product evaluation to ensure that the individual components work together to create an accessible product.		Overall compliance
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Limited Support	Limited Support - Applications do not disrupt or disable accessibility features in the operating system. Screen reader is able to access most of the information from the driver, Smart Panel is not supported. Keyboard navigation has some limitations.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 and 20/200 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people.	Limited Support	Limited Support - Applications do not disrupt or disable accessibility features regarding large print options in the operating systems. Driver supports screen reader, Smart Panel does not. Driver and Smart Panel support Mouse via Numeric Keypad.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Support	Support - Software and hardware operation do not require hearing for operation.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Support	Audio information is not required for use of the printer.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Support	Support - User speech is not required.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Support	Support - Printers have large buttons that are easy to access on C40/C60C80, and controls that can be operated with one hand on all printers.
