

This is a disclosure statement from Epson America, Inc. for purposes of assisting federal employees to comply with Section 508 of the Rehabilitation Act of 1973. The information provided herewith is intended for informational purposes only and does not constitute a warranty of any kind.

Criteria Section (s)	Supporting Features Epson PowerLite G5000	Remarks & Explanations Epson PowerLite G5000
<b>Software applications/OS (1194.21)</b>		
Pertains to usability for people with vision impairments e.g. alternative keyboard navigation.	Support	Overall Compliance. The PowerLite G5000 is a projector, and does not require a keyboard to operate.
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Support	Keystroke combinations allow for activation of software functions within the applications associated with the PowerLite G5000. Within the applications, there is flyover text available to identify tool button functions, and the ability to activate functions using keystroke combinations.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any OS that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the OS and is available to the product developer.	N/A	This projector model does not rely on the accessibility features of the Windows operating system and will not interfere with their operation.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	N/A	This is not applicable, as this is not a software function of this product.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Support	Flyover text for tool buttons and a Help utility are available.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Support	Icons and their associated bitmap images are consistent.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	N/A	This is not applicable, as this is not a software function of this product.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	N/A	This is not applicable, as this is not a software function of this product.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Support	Support - No animations are used in the Software or Utilities.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Support	Support. There are projector status icons that have color codes in EMP Monitor, but status codes of the projectors in the EMP Monitor application also include secondary icons to indicate projector status.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Limited Support	In the projector hardware menu, there are adjustments for contrast, brightness, sharpness, and tint are some of the image adjustments.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Support	Support. There is no flashing or blinking text.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Support with Minor Exceptions	Product CD uses eReg to allow online registration. Software installation and product registration requires use of Tab Key, Space Bar or Mouse. Assistive Technology e.g. voice activation software to input name, address, is supported in eReg.

<p><b>Criteria Section (s)</b></p>	<p><b>Supporting Features Epson PowerLite G5000</b></p>	<p><b>Remarks &amp; Explanations Epson PowerLite G5000</b></p>
<p><b>Video and Multi-media Products (1194.24)</b></p>		
<p>Multimedia products include, but are not limited to, video programs, narrated slide production, and computer generated presentations. Provisions address caption decoder circuitry (for any system with a screen larger than 13 inches) and secondary audio channels for television tuners, including tuner cards for use in computers. The standards also require captioning and audio description for certain training and informational multimedia productions developed or procured by Federal agencies.</p>	<p>Limited Support</p>	<p>No audio inputs or outputs. The G 5000 supports "Close Captioning".</p>
<p>(a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals</p>	<p>N/A</p>	<p>This is not applicable, as the Epson multimedia projectors do not include a television receiver.</p>
<p>(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio program playback circuitry.</p>	<p>N/A</p>	<p>This is not applicable, as the Epson multimedia projectors do not include a television tuner.</p>
<p>(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.</p>	<p>N/A</p>	<p>This is not applicable, as this is a requirement of the software product, not the hardware. Epson is not offering video or multimedia "productions," only hardware.</p>
<p>(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.</p>	<p>N/A</p>	<p>This is not applicable, as this is a requirement of the software product, not the hardware. Epson is not offering video or multimedia "productions," only hardware. However, Epson's multimedia projectors offer both video and audio playback capability as available in the software production. The audio playback offers adjustable volume level control.</p>
<p>(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.</p>	<p>N/A</p>	<p>This is not applicable. It is a function of the playback device (i.e., VCR, DVD player) not the projector. All Epson projectors offer user-selectable inputs.</p>
<p><b>Functional Performance Criteria (1194.31)</b></p>		
<p>Overall product evaluation to ensure that the individual components work together to create an accessible product.</p>	<p>Limited Support</p>	<p>Support with minor limitations</p>
<p>(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.</p>	<p>N/A</p>	<p>Assistive technology features are a function of the attached source device.</p>
<p>(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 and 20/200 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people.</p>	<p>N/A</p>	<p>Assistive technology features are a function of the attached source device.</p>
<p>(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided.</p>	<p>Support</p>	<p>Support - No user hearing is required to operate this product or to retrieve information.</p>

<p><b>Criteria Section (s)</b></p>	<p><b>Supporting Features Epson PowerLite G5000</b></p>	<p><b>Remarks &amp; Explanations Epson PowerLite G5000</b></p>
<p>(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.</p>	<p>Support</p>	<p>Support - There are no auditory messages, sounds, etc. that the user must hear to operate this projector.</p>
<p>(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.</p>	<p>Support</p>	<p>Support - User speech is not required.</p>
<p>(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.</p>	<p>Support</p>	<p>Support - Control buttons are clearly labeled and easily accessible. The projectors are easily positioned so they can be viewed by all potential users. Control buttons are easily operated, requiring less than 5 pounds of force to actuate; are operational with only one hand; and do not require fine motor skills or bending.</p>
<p><b>Information, documentation and support (1194.41)</b></p>		
<p>Pertains to availability of alternate formats for all information, documentation, and support provided to end users of covered technologies</p>	<p>Limited Support</p>	<p>Support with minor limitations</p>
<p>(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.</p>	<p>Support</p>	<p>Support - Product documentation is available in PDF format</p>
<p>(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.</p>	<p>Limited Support</p>	<p>Limited Support - Basic information on accessibility options is available in the product documentation.</p>
<p>(c) Support services for products shall accommodate the communication needs of end-users with disabilities.</p>	<p>Support</p>	<p>Support - Epson offers support via telephone, email and website.</p>
